PRINTING AND PHOTOGRAPHY DIVISION
WEEKLY REPORT FOR PERIOD ENDING
15 December - 21 December 1983

I. Items or Events of Major Interest that have Occurred During the
Preceding Week

A. Congressional Budget Justification Books (CBJBs): Submissions for the FY 1985 CJBs are running at a pace comparable to the previous year's production. At this point, approximately one-third of the projected 28,000 pages have been submitted to P&PD. Also, it is anticipated that there will be a slight increase in the number of color graphics used this year.

B. World Factbook: P&PD representatives met with their counterparts in Office of Central Reference (OCR)/DDI to discuss further automation of the World Factbook through VM. OCR wishes to load the Factbook database into VM, have the editors update it throughout the year, then transmit the data for composition to ETECS. Programmers from OCR are scheduled to load a test tape provided by P&PD and experiment with retransmission to ETECS.

C. Dicomed Interface to VM: P&PD is reviewing a draft Office of Data Processing (ODP)/DDA Tech Note on the implementation of the Dicomed to Disspla/Tellagraf interface. After final system refinements and development of operating procedures, formal announcement and system implementation is anticipated by mid-February 1984.

D. President's Annual Report on International Trade Agreements: The requested P&PD production support by the U.S. Trade Representative during the months of December and January for the subject publication has been postponed until February and March 1984. Because of extensive rewrites and delays in the editorial process, text material for this year's edition will not be submitted until after completion of the CJBs.

E. Happy Holidays from Everybody at P&PD!

II. Significant Events Anticipated During the Coming Week

None
